Altus Coating ALLUX and ALCURE

Product description

Infused with a natural moisturizing agent, this mango-scented face mask ensures intense, long-lasting hydration, even post-rinse. Enriched with a Tropical Bioactive Complex (dragon fruit, mango, papaya, pineapple) for nourishment, it enhances skin's barrier function and texture. Sustainably sourced red algae-derived gelling agents provide a unique, jelly-like consistency that transforms into a refreshing, drip-free liquid upon application. Instantly soothes, cools, and calms redness, perfect after sun exposure or as a hydrating skincare treat.

Claims & Benefits

Hydrating and soothing after sun exposure Refreshing and cooling (can be stored in the beauty fridge for extreme cooling sensation).

Product description

Curled Profile Telescopic Cans are premium secondary packaging solutions crafted from paperboard. Designed for durability, they offer excellent product protection while being fully biodegradable and eco-friendly. Their innovative curled profile ensures a secure fit, making them ideal for delicate products across industries such as food, healthcare, and lifestyle. In 2024, this product won accolades for its innovative design and sustainability, including the India Star Award. With a focus on reducing environmental impact, these cans demonstrate Fibre Foils' commitment to creating

responsible packaging solutions without compromising functionality or aesthetics.

Claims & Benefits

Eco-friendly: Made from biodegradable materials, reducing environmental impact. Durable: Provides robust protection for delicate and valuable goods. Innovative Design: Curled profile ensures secure fit and aesthetic appeal. Award-winning: Recognized for sustainability and packaging excellence. Customizable: Tailored sizes and designs for various applications. Lightweight: Easy to handle and transport. Sustainable Solution: Encourages responsible product packaging practices.

Product description

A plant powered elixir, VBrass™ Butter is an emollient that harnesses the power of nature's golden elixir, mustard oil. This rich blend is meticulously formulated with a curated selection of rich lipid constituents, derived from the heart of mustard seeds. Enhanced with select fractions of plant-based fatty alcohols, Mustard Oil transforms into a buttery- soft fatty acid ester composition. Upon application, it melts effortlessly into your skin, leaving it super nourished and indulgent.

Claims & Benefits

For Formulators/Brands: Shea Butter like benefits at 1/3rd it's cost. Easy Inventory Management. Available in multi forms: Butter, Soft Wax, Hard Wax For Community & Environment: Supports Ancestral Occupation. Explores application beyond traditional use of edibles and hair oil. Local dependency (low carbon footprint) promotes Make in India Ideology. Significantly lower environmental impact compared to peers/likes. For Consumers : Vegan & Cruelty Free. 100% Naturally derived. Nourished Moisturized & Indulgent Skin. Strengthens & restores skin barrier. Promotes healthy glowing skin.

CLAY MI-150 is the automatic technological answer to the up-to-date B&PC Industry needs. The future will be oriented towards multitasking products: CLAY MI-150 is the solution that allow a filling optimization process of all hybrid product categories guaranteeing either speed and efficiency or dosing precision placing the well-being of the operator at the centre.

Claims & Benefits

CLAY MI-150 is the automatic technological answer to the up-to-date B&PC Industry needs. The future will be oriented towards multitasking products: CLAY MI-150 is the solution that allow a filling optimization process of all hybrid product categories guaranteeing either

speed and efficiency or dosing precision placing the well-being of the operator at the centre. The claims of CLAY MI-150 are related to extreme PRECISION in dosing (from 1 mL to 250 mL) while maintaining the highest SPEED and FLEXIBILITY during the filling processes. The FLEXIBILITY benefit is linked to its outstanding design: the 15-positions rotary table is made by removable and interchangeable bush holders that allow the fastest format change, minimizing machine downtime with a user-friendly interface. The electronical components minimize the operator's delta error as any adjustment is carried out accurately directly from the operator panel via a single interface with self-diagnosis functionality. CLAY MI-150 is innovative thanks to the attractive and original style of the machinery designed to put the operator's well-being and safety first during filling processes. All the development has been carried out thinking the perfect coexistence of human and technological elements.

Bayssil Cosmic Private Limited

Bioplex Nutrinfusion Treatment

Product description

Nano technology powers this hair restoration and straightening system, which has been conceived as an in-salon treatment. In contrast to keratin or chemical straightening treatments, the formula is free of formaldehyde and acts to deeply repair, smooth, and rejuvenate hair. The cream-based treatment's key ingredients include argan oil, keratin protein, collagen, vitamin E, and natural plant extracts. The formulation is crafted with a Nutrinfusion Complex that penetrates deep into the hair fibers to restore moisture balance and strength while straightening. Developed via a cold-blend technology to preserve the potency of the natural ingredients, the formula ensures maximum nutrient

absorption. And unlike traditional conditioners that coat the hair surface, the micro-nutrient nano technology penetrates the hair cortex, rebuilding internal strength while restoring hair's natural moisture balance.

Claims & Benefits

Deep Penetration Of Active Ingredients Via Nanotechnology
Restores Elasticity And Softness
Long-lasting Frizz Control And Smoothness Adds Mirror-like Shine
With Reduced Styling Time

INNERCOSMO LIFE SCIENCES PRIVATE LIMITED

Skin Detox AeroGlass™ Cushion Foundation

Make Up, Skin Care, Hair Formula

Finalist

Innercosmo Life Sciences Private Limited

Skin Detox AeroGlass™ Cushion Foundation

Product description

Transcending the boundaries of traditional foundation, Skin Detox AeroGlass™ Cushion Foundation is crafted through advanced transfer proof serum-gel technology that delivers an all-day seamless, refined finish. Its airy texture integrates effortlessly with the skin, creating a soft, natural luminosity from the first touch. This modern makeup-skincare hybrid forms an invisible urban-defense veil, protecting without weight or residue. Buildable and soothing, it adapts to any routine with ease, offering polished radiance and long-lasting comfort. Designed for the pace of city life, it leaves skin balanced, fresh, and beautifully enhanced.

Claims & Benefits

- AeroGlass™ Technology creates an ultra-light, serum-gel matrix for seamless glide and comfortable wear.
- SPF50 protection helps defend skin from daily UV exposure.
- Anti-pollution shield helps reduce adhesion of PM2.5 and supports protection against blue-light stressors.
- Breathable, buildable coverage maintains a natural look without caking.
- Long-lasting, waterproof and transferproof performance suitable for humid, urban conditions.
- Hydrating formula with hyaluronic acid supports moisture retention throughout the day.
- Dewy glass-skin finish enhances skin's natural radiance without heaviness.
- Gentle makeup-skincare hybrid comfortable enough for extended or overnight wear.

STB INTERNATIONAL

Metal slim Mascara

STB International Metal slim Mascara

Product description

Metal Slim Mascara was born from the idea of redefining precision in mascara application. During development, our team explored consumer frustration with clumping and thick brushes. The result—a slim, metal-tipped wand designed for control and accuracy. Combining advanced film-forming technology with lightweight polymers, the formula delivers rich pigment and all-day hold without heaviness. Its innovative metal applicator ensures perfect lash separation and hygienic use. The product has already gained strong interest from professional makeup artists for its refined design and performance-driven concept.

Claims & Benefits

- * Precise metal-tip applicator for clean, defined lashes
- * Smudge-proof, clump-free, and humidity-resistant
- * Lightweight formula with flexible film polymers
- * Hygienic and easy-to-clean applicator
- * Suitable for short or fine lashes
- * Long-lasting lift and curl effect for up to 24 hours

DinoLabelDigital

Digitally Printed PP-Silver Labels
(with CYMK + White ink)

Product description

DinoLabelDigital's Digitally Printed PP Silver Labels marry a metallized polypropylene film with advanced digital printing AccurioLabel 400 press to achieve high end metallic shine and depth using White ink. The glossy silver film functions as a built in foil like effect; opaque white toner is applied selectively to create brilliant highlights or solid colors, simulating traditional foiling effects. A luxury look is attained with no stamping foils, embossing dies, or laminates, drastically cutting production waste. Brands can order small runs with variable data, benefiting from agile production and minimal setup. The result is a premium yet eco-conscious.

Claims & Benefits

- All Digital Luxury Provides metallic shine using digital printing only; no foil or embossing required.
- No Wasteful Processes: Achieves premium effects with zero foil rolls, metal dies, or laminations—cutting material waste and setup time drastically.
- Agile Low MOV: Ideal for short runs and personalization, allowing brands to launch limited editions quickly with low minimum order value.
- Sustainable Materials: Uses FSC certified label stock and water based adhesives. The PP construction avoids mixed material waste for easier recycling.
- Premium Quality: High resolution digital printing yields crisp details; the film is durable and water-resistant, keeping labels vibrant in use.

EFFICIENT PLASTECH PRIVATE LIMITED

Custom Packaging for Lakme Sunstick 8gms

Packaging: Design & Materials

Finalist

Efficient Plastech Private Limited

Custom Packaging for Lakme
Sunstick 8gms

Product description

The new on-the-go custom sunscreen stick packaging offers a first-mover advantage in its category. Designed with a compact, twist-up dispensing format, it combines premium aesthetics, sustainability, and portability—achieving 50% size reduction without altering the filling process. Concepts were developed through in-house ideation, consumer co-creation, and 3D prototyping for validation before tool development. The design effectively meets consumer needs for convenience, hygiene, and premium appeal.

Claims & Benefits

The packaging delivers multiple benefits: portability with a compact, travel-friendly size; sustainable design using reduced material and efficient filling compatibility; a smooth twist-up dispensing mechanism for easy, hygienic application; and premium tactile embossed branding for enhanced shelf appeal. It allows brands to offer consumers convenience and luxury in one product, while maintaining process efficiency and recyclability. This innovative format creates strong differentiation in the sunscreen stick category, providing brands with a first-mover advantage and consumers with a superior, on-the-go skincare experience.

FR & Partners SA

R-Sue

Product description

R-SUE was developed with criteria focused on sustainability and the intelligent use of packaging systems throughout the product's lifecycle. Made from over 97% eco-friendly Cork, the packaging features a removable metal pan that can be detached with a simple movement.

Claims & Benefits

R-SUE, in addition to the added ergonomic and grip benefits provided by the special key feature of Cork, is the emblem of core minimalist design and therefore inherently sustainable. The case, besides being made from organic materials, is highly customizable, but above all, its design allows it to be repurposed for a "second life" as a container. The metal pan offers an additional advantage compared to those on the market, as it is preformed with a crown that allows for an extra circular decoration. The removable pan, making it easy to separate for proper disposal and recycling.

ISIMAT SIEBDRUCKMASCHINEN

Bio-based Cosmetic Jar

Packaging: Design & Materials

Finalist

ISIMAT Siebdruckmaschinen

Bio-based Cosmetic Jar

Product description

This project showcases the blend of sustainable materials and innovative decoration technology. ISIMAT collaborated with KURZ Design to create a cosmetic jar made entirely from bio-based, fully recyclable material, including its decoration. The jar's design features elegant floral-Asian motifs with metallic and vibrant colors, applied using Direct Digital Decoration combined with ISIMAT's unique Conical inLINE FOILING technology, allowing 360° coverage on conical shapes. This patented multi-metallic foiling creates shimmering effects with UV curing, demonstrating ISIMAT's leadership in hybrid decoration. The integration of digital printing enables high design flexibility and cost-effective customization for series or limited editions.

Claims & Benefits

100% Recyclable: Constructed entirely from PP, the EcoPure Dropper is designed for seamless recycling. **Eco-Friendly:** No need to separate components; the single-material design reduces waste. **Leak-Proof Seal:** Features a secure seal to prevent leakage, ensuring product safety. **Customizable:** Available in various colors to align with brand aesthetics. **Sustainable Packaging:** Compatible with PCR glass or plastic bottles, promoting a fully eco-conscious solution.
